

DEBRIS SCREENS® PROTECTIVE SCREEN SYSTEM FOR SCAFFOLDING

Debris Screens® have been making protective safety screens for scaffolding, construction sites and temporary fencing for over 10 years with "tough testing making work sites safer".

Our products come in many different sizes, grades and colours for many different applications, but all are leaders in protecting people from harm, debris and weather. All not only save people and property from damage, but save money in maintained efficient productivity.

All systems themselves are economical, robust and durable. They are quick and simple to install, needing no specialist training.

They all enjoy high visual impact branded colours, which can include logos, but always significantly enhance your professional image.

Debris Screens® - Smart Choice!

PROTECT	<ul style="list-style-type: none">– People's health and safety– Against weather– Against debris– Tools and materials– Quality assured
SAVES MONEY	<ul style="list-style-type: none">– Strong– Long lasting– Durable– Ease of installation– Re-useable
IMAGE	<ul style="list-style-type: none">– Highly visible, vibrant colours– Corporate identity, branded logos– Clean, tidy and impactful– Professional and safety conscious image

Edge protection starts with Debris Screens®

- Embrace Health and Safety regulations and enhance your reputation and image
- Debris Screens are 1.2m or 2.4m long, 1m or 1.8m high and 2.5mm thick
- The galvanised 'Spring Wire' steel mesh has 100mm square openings and comprises wires 2.5mm diameter, with double perimeter wires for additional strength for fixing
- Debris Screens are robust and durable and consequently can be easily removed and reused many, many times
- The mesh is encapsulated in UV stabilised, breathable, semi transparent polyethylene sheeting
- The poly film colour can be customised to your corporate or branding requirements

Safe and Sound with Safety Screen® Systems
